

5 와이드스크린 LCD

Marvel. Because there is nothing quite like it. With 5 widescreen UltraSpeed™ LCD Panels featuring resolutions of up to a mammoth 19200 x 2400 Pixels, the new J Athens Display Series brings desktop views and resolutions to unheard of new heights. Featuring J's Ultra-Speed™ Display Technology and available in both HR and for the first time in available 3D LCD configurations, the all-new J Athens Display Series is exclusively custom-built in an all-aluminum design, breaking grounds in every engineering and design detail, making every other monitor out there look like... well... just a monitor. Bringing your computing graphics and pro visuals to a whole new level, the new J Athens Display Series are breathtakingly designed, maximizing both their enclosure size and the flexibility of positioning where physical space is at a premium. Under 2.5" thin, they are the ultimate adrenaline rush for the hardcore graphics professional, the high-end home theatre user and the multi-panel and presentation business environments. Available with future upgradeability like Bluetooth Wireless connectivity, they represent ideal tool for creative professionals for whom display space maximization and image quality are absolute priorities, delivering resolutions of up to 19200 x 2400 pixels and 16.7 million colors in an ultra-wide color gamut, allied to a super wide viewing angle, and bringing you out-of-this-world incredible color fidelity and an ultra fast pixel response. Its size is only the beginning of the story because under the skin, you'll find the most advanced technologies and design, bringing the way you interact with computers to a radical new height, and the view of your desktop, to a breathtaking new perspective. Get ready for the most gorgeous computer displays you have ever seen. Surf the net, surf HDTV, surf the multiple cameras of your TV, Audio or Post Studio. Surf where ever your imagination may take you. Get ready for the largest and highest quality image you've seen on your desktop. And, get ready to settle for nothing less from now on. The new all-new J Athens. Everything else out there, is small-time.

- 110" to 200" Screen Sizes.
