Focusing on time and eliminating all "distractions" are some of the ideas that have inspired Rosendahl's new series of timepieces.

This thinking is exquisitely reflected in the digital wrist watches which show the time and date - and only the time and date.

The wrist watch is available in two models with digital display - one with a black dial and pale-coloured numerals and one with a pale-coloured dial and black numerals. The digital wrist watch is easy to set.

The digital wrist watch is made of stainless steel and black polypropylene and is designed by Flemming Bo Hansen.
