

## TypeMatrix의 뉴타입 키보드

참신하다고 해야 하나? 5가지 모듈을 통해 인체에 무리를 주지 않고, 속도 면에서 실험을 거친 최고의 키 배열이라고 한다. 가격은 Qwerty가 \$110, Dvorak은 out of stock이군. 그나저나 기본 자판배열도 다른 것 같은데, 한글은 지원될까?

EZ-REACH 2030

### Small Size

- Smallest keyboard with full-sized keys and complete functionality
- Footprint - 12.75w"x5.5h"x.5d"
- Fits over notebook keypads without covering the touch pad
- Mouse close to the right hand

- Portable – fits easily in briefcase, notebook case, backpack
- Flat – sleek – lightweight

### Intuitive Design

- Grid layout – easy to learn and easy on the fingers, hands, arms
- Logical, modular design
- Large Shift, Backspace, Enter keys
- Less reaching to frequently used keys and mouse
- Calculator-style Number Pad
- Tactile feedback on keys - ridges and bumps
- Color-coded for easy use
- PS/2 Connector

### Ergonomic Solutions

- Prevents typing injuries
- Reduces or eliminates existing typing symptoms
- 90% of users get complete or significant reduction of pain
- Switchable to Dvorak layout (50% less finger travel)
- Keyboard and typist centered on monitor
- Terrific design for programmers and power users
